Open Access

Erratum to: Interleukin-1beta-induced reduction of tissue water diffusion in the juvenile rat brain on ADC MRI is not associated with ^{31}P MRS-detectable energy failure

Raman Saggu

Unfortunately, after publication of this article [1], it was noticed that Fig. 1b (Fig. 1 here) is incorrect. The corrected figure can be seen below.

Submit your next manuscript to BioMed Central and we will help you at every step:

- We accept pre-submission inquiries
- Our selector tool helps you to find the most relevant journal
- We provide round the clock customer support
- Convenient online submission
- Thorough peer review
- Inclusion in PubMed and all major indexing services
- Maximum visibility for your research

Submit your manuscript at

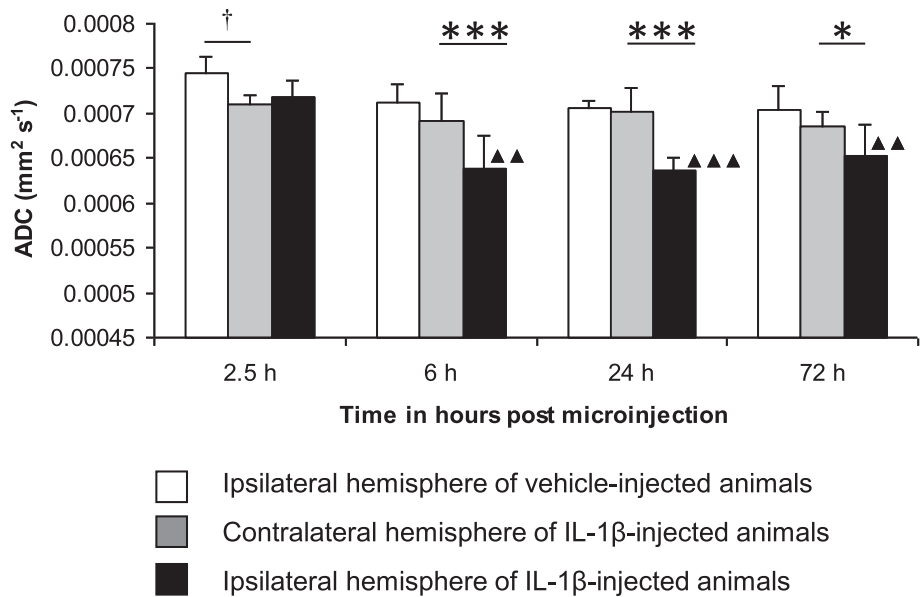

Fig. 1 Time course of MRI changes following intrastratial microinjection of 100 ng/μl IL-1β. *ADC changes determined by thresholding.* Mean ADC (error bars indicate a 1 SD) within the ipsilateral or contralateral striatum. Statistical significance indicated by *** $p < 0.001$, * $p < 0.05$; paired t -test, † $p < 0.05$; unpaired t -test and ▲▲▲ $p < 0.001$, ▲▲ $p < 0.01$; one-way ANOVA, post-testing using Bonferroni multiple comparisons test, with respect to the ADC of the IL-1β-injected hemisphere at 2.5 h
